PROJECT

- E-Commerce Website** [November 2023 – present]
Description: Built a responsive MERN stack e-commerce site with secure JWT-based authentication, Khalti payment integration, and admin features for streamlined product and category management.
Technology Used: React ts, Node, Express, MongoDB, Formik & Yup, React Query
Github: <https://github.com/harisharanChaulagain/ecommerce>
- Task Manager** [December 2023]
Description: Built a MERN stack Task Manager enabling users to add, prioritize, and delete tasks. Implemented a completion feature redirecting completed tasks to a separate page with restricted deletion access.
Technology Used: React, Express js, Node js, MongoDB
Github: <https://github.com/harisharanChaulagain/simple-task-manager>
- Portfolio Website** [December 2023 – present]
Description: Designed and developed a personal portfolio website using React, showcasing my skills, projects, and professional journey. The website offers an intuitive user experience, featuring responsive design and modern UI elements.
Technology Used: React
